

[The Truth About the Cap and Trade](#) a.k.a. “American Clean Energy and Security Act of 2009”

The “American Clean Energy and Security Act of 2009” passed in the House of Representatives by a vote of 219-212 on June 26th. Up until the day before, the bill did not have enough votes to pass. A 300-page amendment was added at 3am the night before the vote that included massive ethanol subsidies and other pork to bribe undecided representatives. At the time of the 7pm vote, the 1500-page final bill was still not in its final form, but it was voted and passed anyways.

The supporters of this bill claim that it will stop global warming (climate change). The problem is that global warming doesn't need to be stopped. Have you wondered why news reports are calling it climate change these days? It's because the globe has been **cooling** for the last 7 years in contradiction of what the fancy computer models predict. So even though the earth has stopped warming, even though the scientists can't prove that if warming happens that it is a bad thing, our arrogant political elites are going to pass a bill that will:

- Incur direct and indirect costs estimated to be as much as **\$3000** per family of four regardless of how much they earn
- Require a government bureaucrat to certify that your house is green **before you can put it up for sale**
- Cause businesses to outsource jobs to China, India, and Brazil where they reject this nonsense
